The Spring Arm Steering Wheel

Made in two sizes—16" and 18" diameter

Primarily designed for sports cars, the Spring Arm Wheel has proved very popular with users of fast touring and other cars. It absorbs road and engine vibrations, greatly reducing the strain of driving at speed. The Spring Arm model is an all-steel wheel, celluloid covered, the ring being a weldless steel tube of small oval section. The

The reeded pattern covering.

arms are two spring steel leaves, securely held at the centre to a wide steel flange, and surmounted by a steel cap, the whole being strongly rivetted together, making an assembly of exceptional strength. The arms are covered in celluloid. Supplied with reeded pattern, or finger-impression grip as illustrated.

18" wheel can be supplied machined to fit any of the following cars without extra charge: Morris Cowley, Morris Oxford, Rover 10 h.p., A.C., Lea-Francis 12 h.p., Fiat 10 h.p., Rhode 10 h.p., Armstrong Siddeley 14.

Wheels with lug on boss or broached, such as Alvis, Bentley, Humber, Austin 12, and Marles Gear, are charged at slightly higher price to cover extra cost.

* * * *

The 18" wheel can also be supplied with detachable boss to facilitate machining the hole in the boss to fit steering column top. The boss can be removed in a few minutes by simply unscrewing the bolts. Boss of 18" size permits of a 1" maximum diameter of hole at top, and a 1 $\frac{1}{8}$ " at bottom, with necessary keyway. If broached, maximum diameter of hole 1 $\frac{1}{4}$ ". Boss of 16" size permits of a 7/8" maximum diameter hole at top, and a 1" at bottom.

If broached, maximum diameter of hole 1".

Illustration on the left shows the detachable boss of 18" wheel.

The 16" size is suitable for the Morris Minor, Austin Seven, and Triumph Seven, etc., etc. Reeded pattern grip only.

16" diameter	Price 42/- each
18"	Price 45/- each

Used by the following Manufacturers:—A.C., Alvis, Bentley, Clement-Talbot, Hillman, Lagonda, M.G. Sports, Riley, etc., etc.
